

**81% of marketers
want integrated
AI. Only 45% get
it.**

The integration gap is the agency gap

81% of marketers want AI capabilities integrated across creative, media, commerce and earned. Only 45% say their current partners deliver it. That 36-point gap is not a technology problem — it is an orchestration problem.

Close the gap, capture the budget

97% of marketers say they would increase spend with a partner who actually closes the cross-channel AI gap. The opportunity is sitting in front of every agency and consultancy that can unify the workflow.

Agentic AI is where the next two years go

74% of marketers plan to increase investment in agentic AI channels over the next two years. Only 21% fund this from new budget — 45% reallocate from paid media, 35% from brand budgets. The money is already moving.

The unit of transformation is the workflow

BCG and Google's conclusion is not 'adopt more tools.' It is: agencies that use AI to unify fragmented operations into a single orchestration layer win. That is what we build — the Madison Avenue playbook, encoded as agents.

Receipts.

**BCG × GOOGLE THINK, 'THE EXPANSIONARY
MOMENT,' JAN 2026**

81% want integrated capabilities / 45% get it

BCG × GOOGLE THINK, JAN 2026

97% would increase spend with a partner who closes the gap

BCG × GOOGLE THINK, JAN 2026

74% increasing agentic AI investment over next 2 years

BCG × GOOGLE THINK, JAN 2026

45% reallocating from paid media to fund AI innovation

The orchestration gap is the opportunity.
